Dealings in Large Volume at the

Early Prices Show a Great Deal of

NEW YORK, Nov. 9.-The dealings in stocks were again in immense volume upon the opening of business this morning. The early prices showed a good deal of irregularity, the railway list being depressed, apparently in sympathy with the London market, where declines were commen but were not directly accounted for by anything in the news of the morning. These declines extended, in the instance of Northern Pacific, common, to 1 per ent, but elsewhere they were limited to fractional figures.

The dealings in the railway list were heaviest in Northern Pacific, Louisville and Nashville, Pennsylvania and St. Paul, Notwithstanding the declines in the rail-way list, other quarters of the market showed aggressive strength. Mannattan and Brooklyn Rapid Transit were particu-larly active and were dealt in at about yesterday's final level. Metropolitan Street Railway was less active, but was

firm.
In the industrial quarter, the strong features were National Tube, American Steel Hoop, American Car Foundry, and in fact practically all of the lower priced

The general course of the Stock Mar-et this morning was like that of yesterwith a rapid advance in the New York Traction securities and in the industrials, and hesitation and some reaction in the railway list. During the first hour the tractions made a big bulge, and one or two of the industrials made good gains, and it seemed probable that this would be the tendency during the greater part of the day. On the other hand, the selling in the railway list was, tempoarily at least, larger than the buying. t seems not improbable that there will be a reaction in the larger part of the list before the end of the week tomorrow. Such a turn after the big boom would not only be natural, but it would be a good thing for the future stability of the market. It will not do to allow the public to think that there are never to be any declines. This would drive them crazy too early in the game. From preserved ent indications, the steel securities, and perhaps one or two other stocks, may be held comparatively strong during this recession. No violent decline is to be looked for. The market seems to be a idening and advancing one, and price are likely to be much higher before there is any important break. The total of

Brooklyn Rapid Transit advanced to above Opening of Business.

Brooklyn Rapid Transit advanced to above 70 during the first hour, or ten points for the week so far. Manhattan advanced to 169 and Metropolitan to 168 and a fraction. This kind of sharp advance is an acu'te reminder of the boom of two years ago. With the better understanding of the actual situation regarding these companies and their securities the public known how that they are far more deserving of reaching high prices than they were then. The report of the Brooklyn published yesterday shows an excellent balance after paying all charges and interest. It was again whischarges and interest. It was again whispered in the Street this morning that the Metropolitan people have control of historia and Brooklyn, but no new fact bearing on the story could be learned.

is probably the fact, as it is stated by people as near to the Havemeyers as anyone usually gets that they do not wish to fight any more and particularly desire to make money out of their business. A boom to much higher prices in Sugar is the subject vesterday to Mr. Payne, but he refused to talk seriously on the subject. boom to much higher prices in Sugar is not unlikely, but for various reasons it is not a stock that it is desirable to speculate in. The market offers so many stocks that are better for one thing. The stock sold above 130.

The statement of the Tobacco company for three and for nine months is an excelent one. There was an increase of \$269,262 in the net earnings of the company for the quarter ending with September. The net carnings for the nine months ending with September were \$4,666,484, or enough to pay all the interest and dividends for the pay an the interest and dividends for the entire year. The statement of the Continental Company was also published, but did not make nearly so good a showing. It may be well for people who wish to speculate in American Tobacco to remember that this company owns the Continental and that a juggling of earnings between the two concerns would not be impossible if such a thing were desirable for any pur-pose connected with the stock market or

Pennsylvania continued to occupy a con-spicuous position in the market, though it declined somewhat. Some good selling was noted in the stock during the aiter-noon and it is not impossible that the manipulators of its boom have decided to allow it to rest a few days. As to the outlook for the stock, however, there can be no discounting its rosy look. As one of the financial papers points out, the com-pany has been paying dividends without a break for nearly fifty years and has not paid less than 5 per cent during the past sixteen years. Now, the stock is virtually on a 5 per cent basis as far as the proba-bilities are concerned, although, of course, the management has made no formal an nouncement of such a permanently in creased dividend.
